

Track system
IMAGINARIUM

Just imagine...

ENDLESS
POSSIBILITIES
FOR YOUR
IMAGINATION

LIGHTEX

IMAGINARIUM

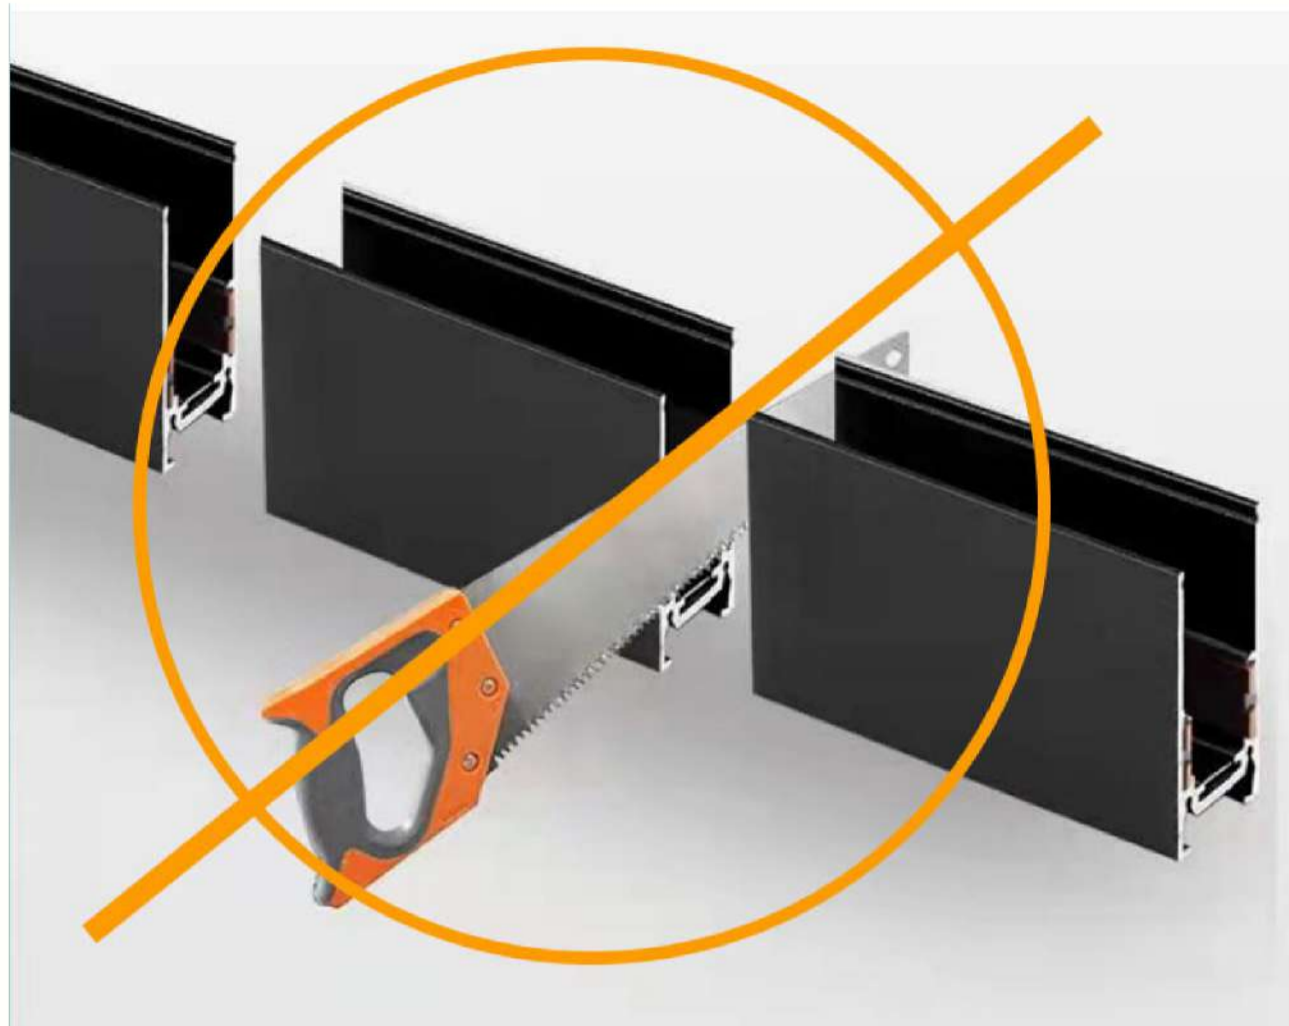

is a low-voltage flexible LED lighting system, which allows multiple options and combinations for installation.

The system is built from a flat cable, which is both a conductor of electricity and a track for mounting the lights.

The IMAGINARIUM system cable is available in 7 colors. It is fixed to walls or ceilings by holders, and the main supply to the cable passes through a transformer (220V - 48V).

The type and placement of the luminaires can vary according to the individual preferences and needs, giving identity and character to any room.

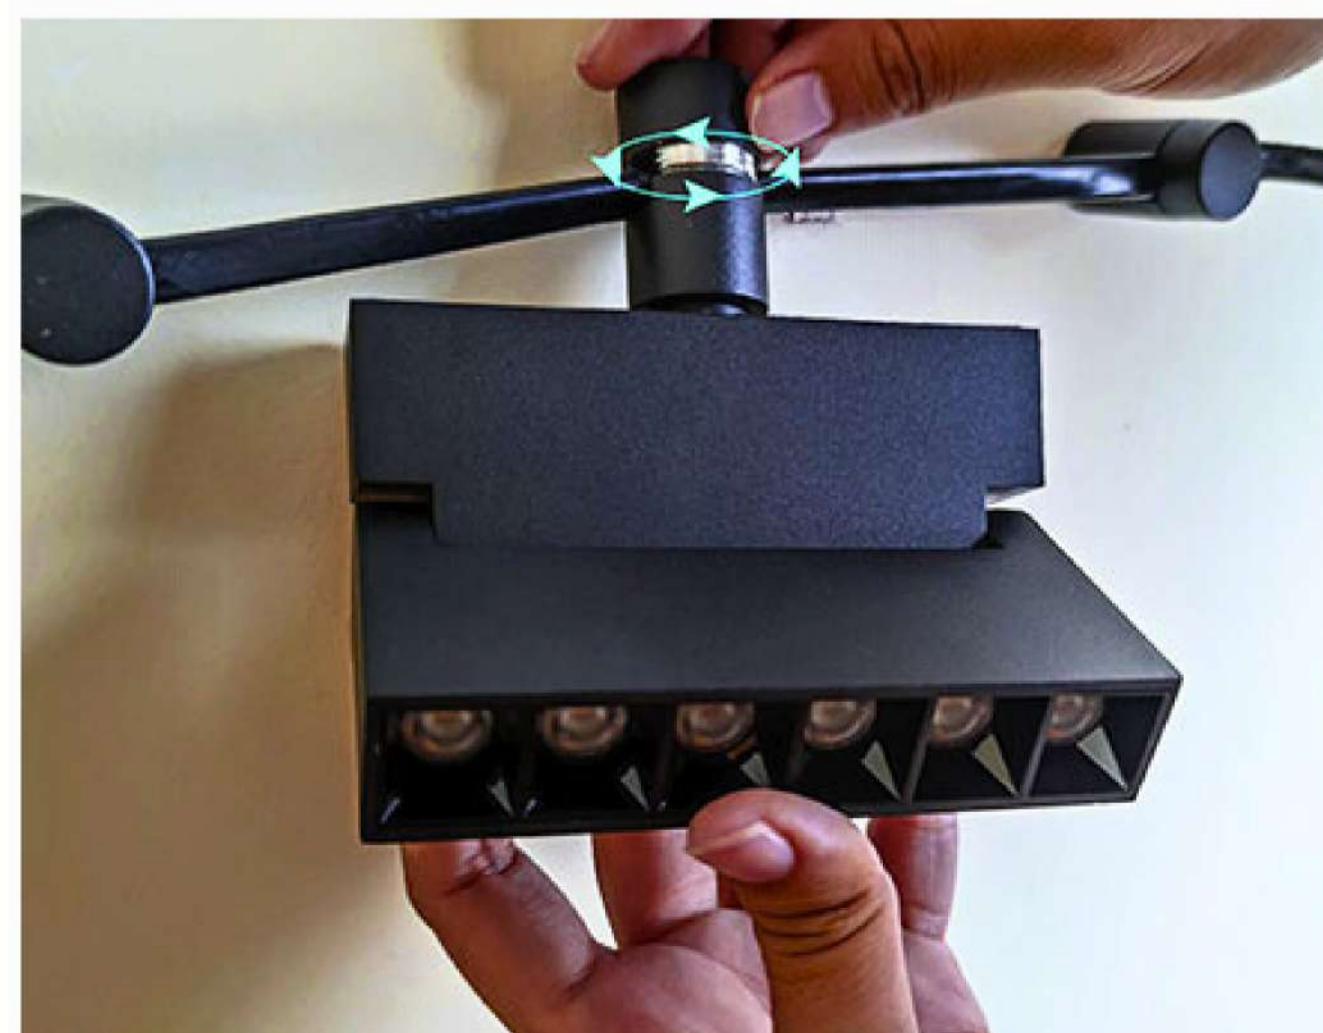

Quick and easy installation

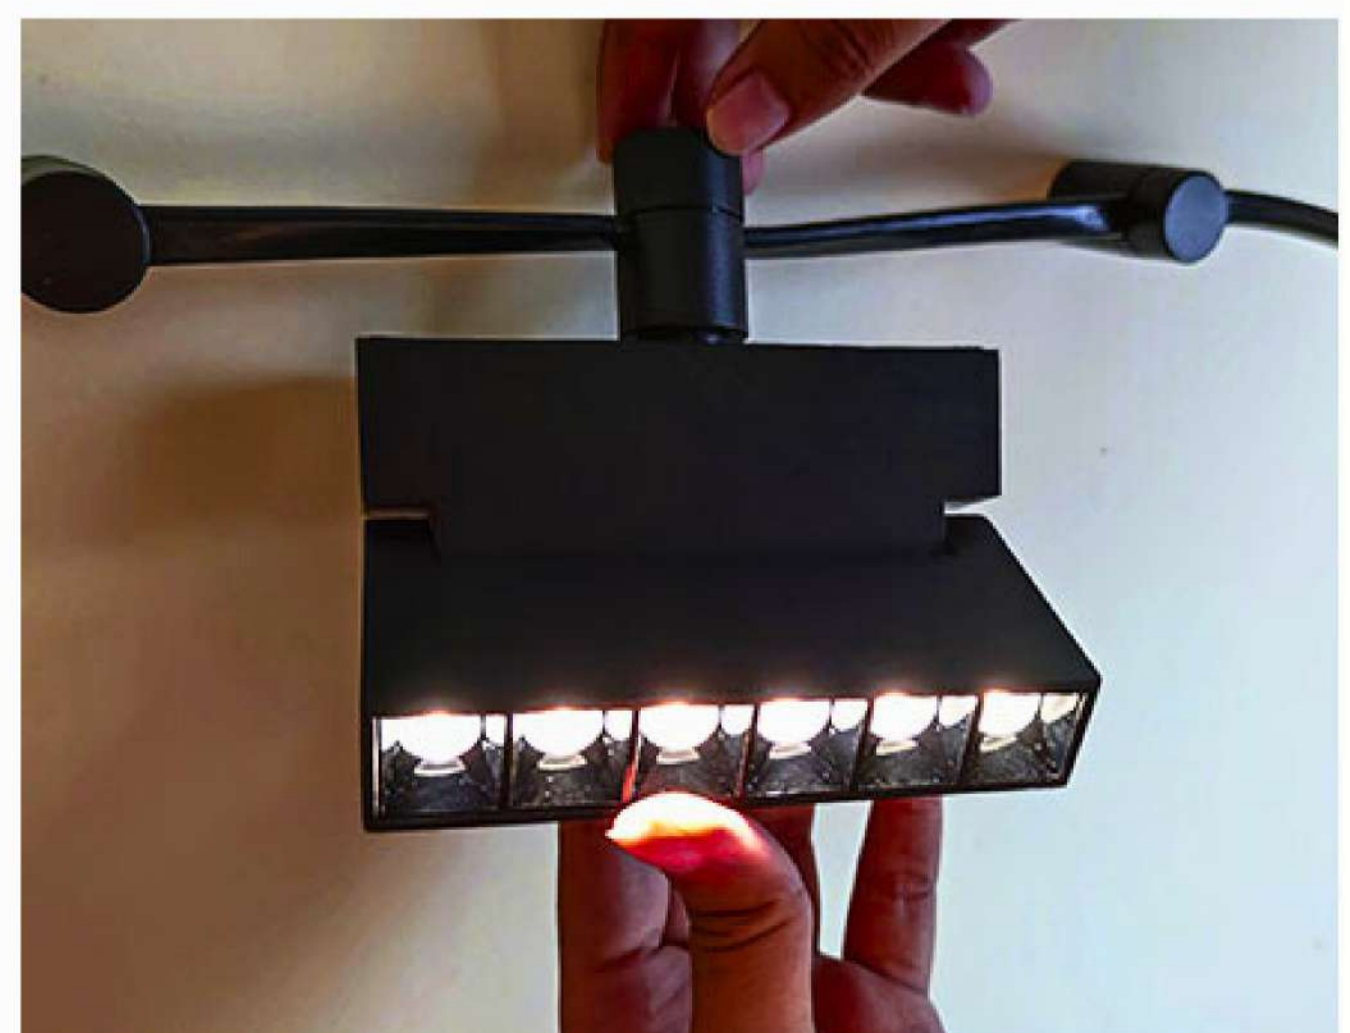

① Mount the holders

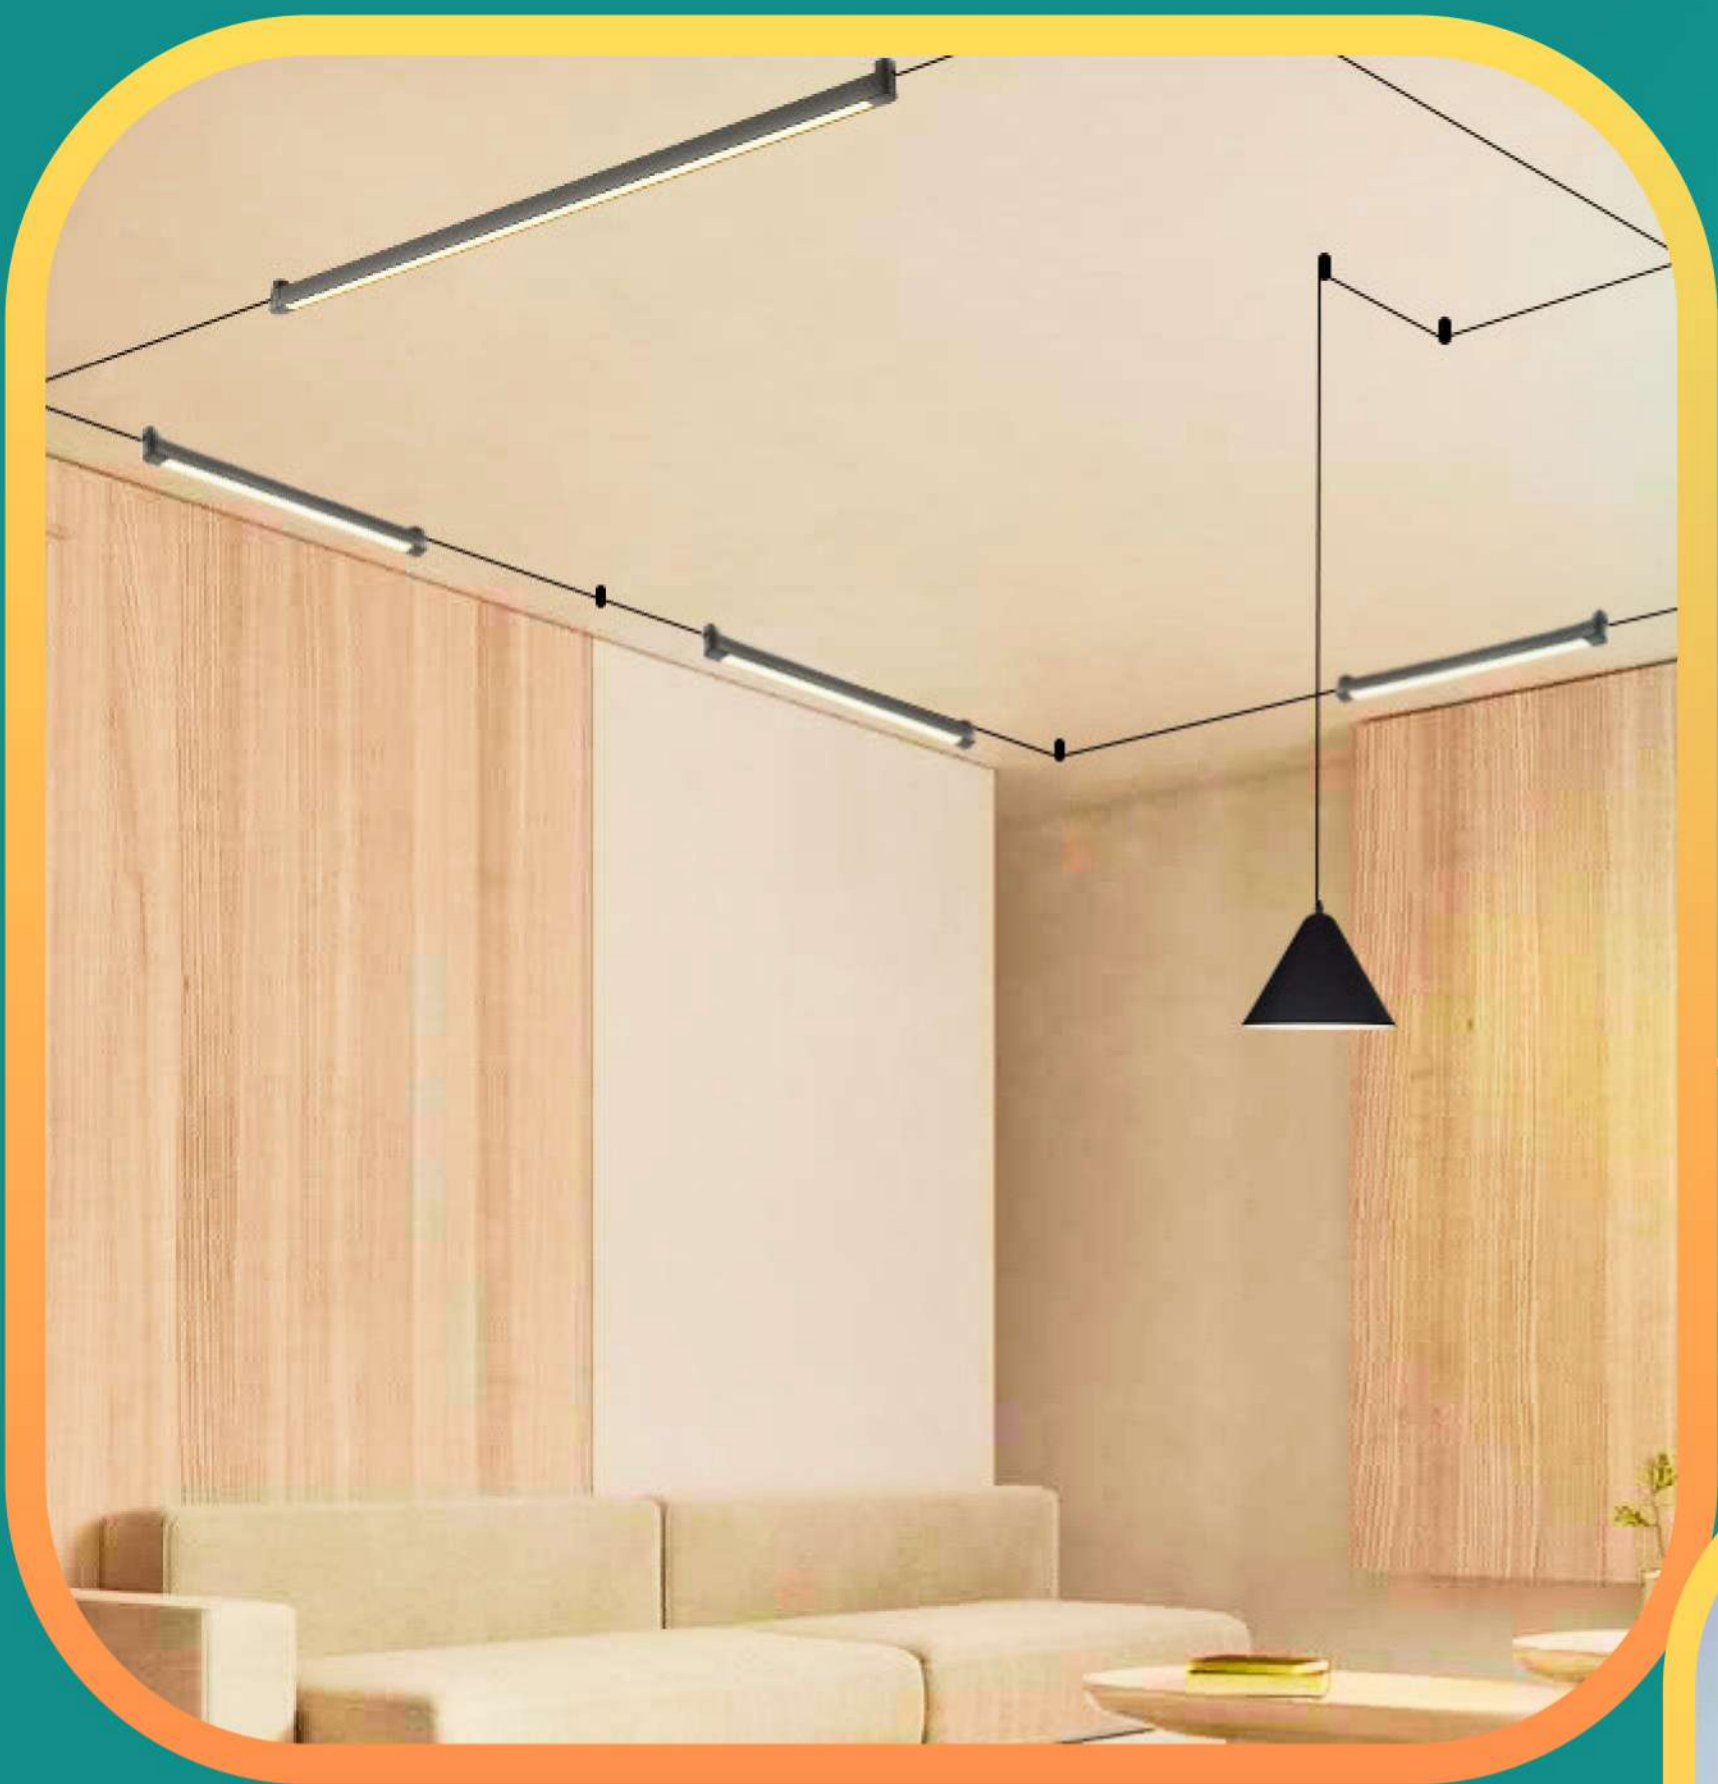

② Fix the cable to the holders

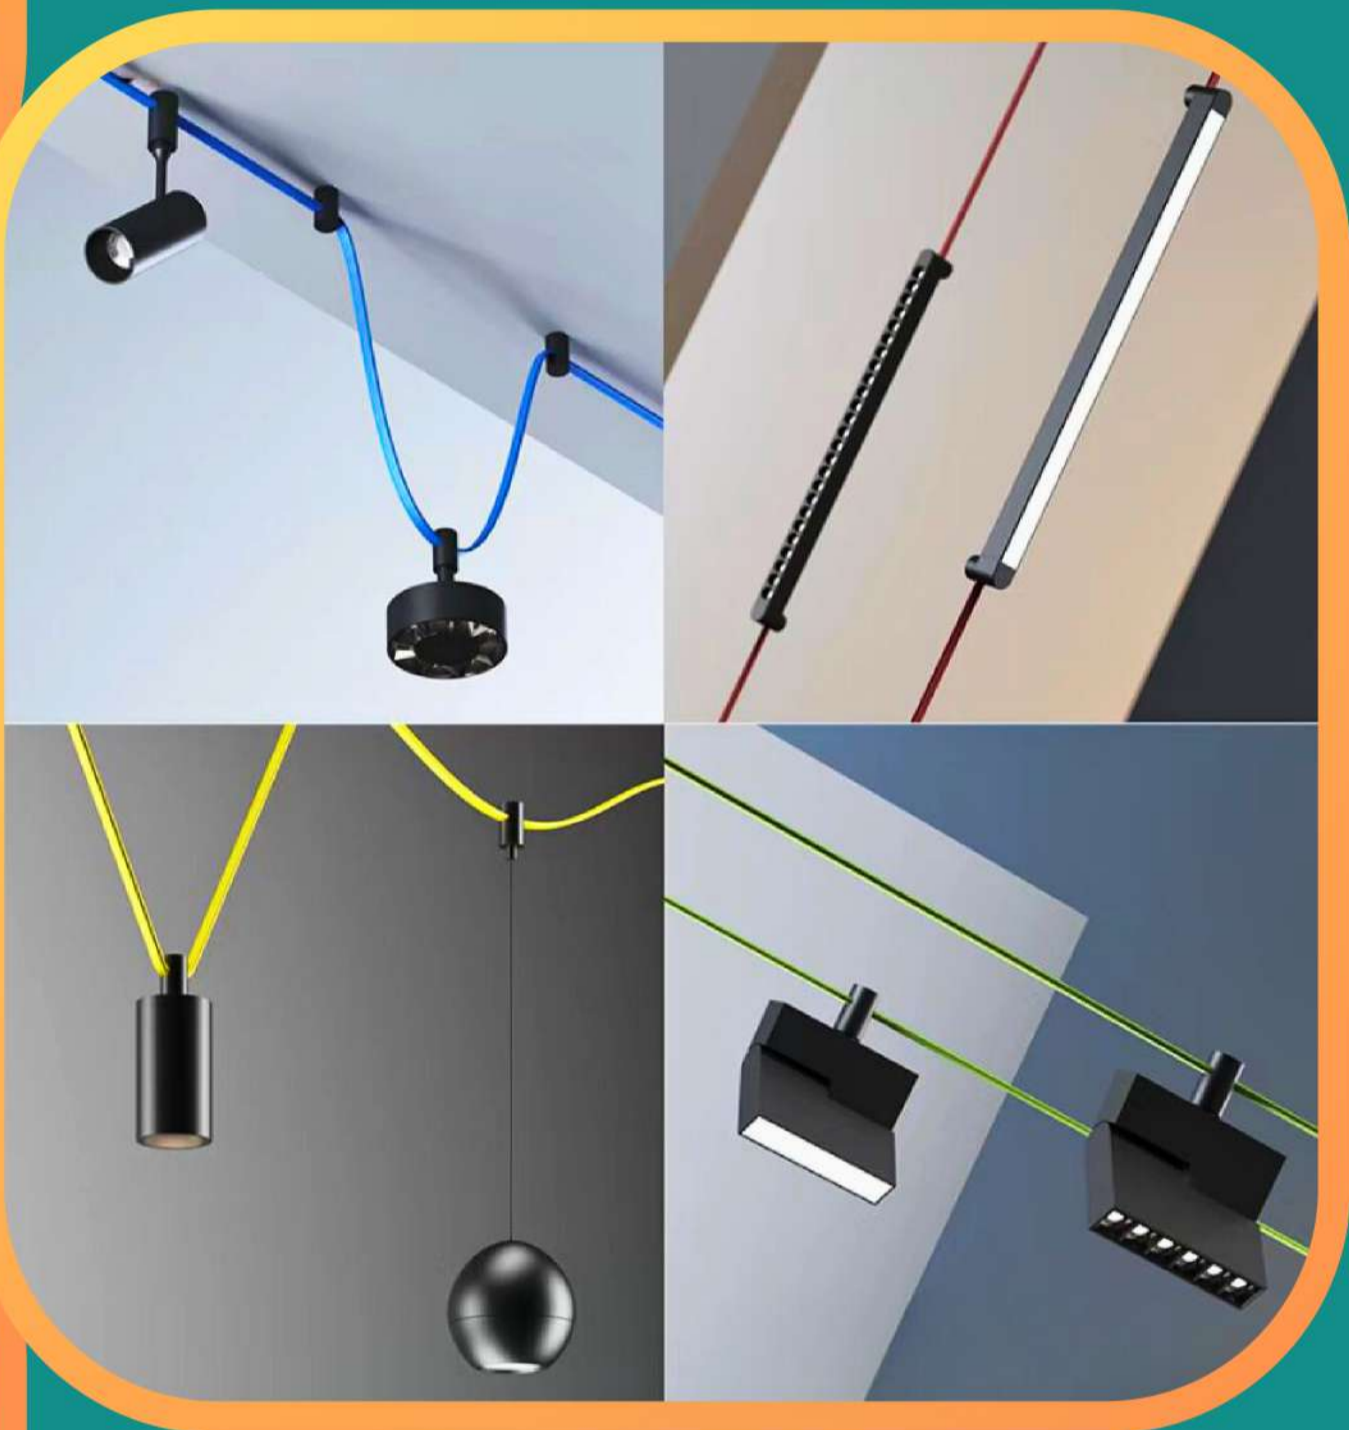

③ Place and fasten the luminaires

④ Switch on and test

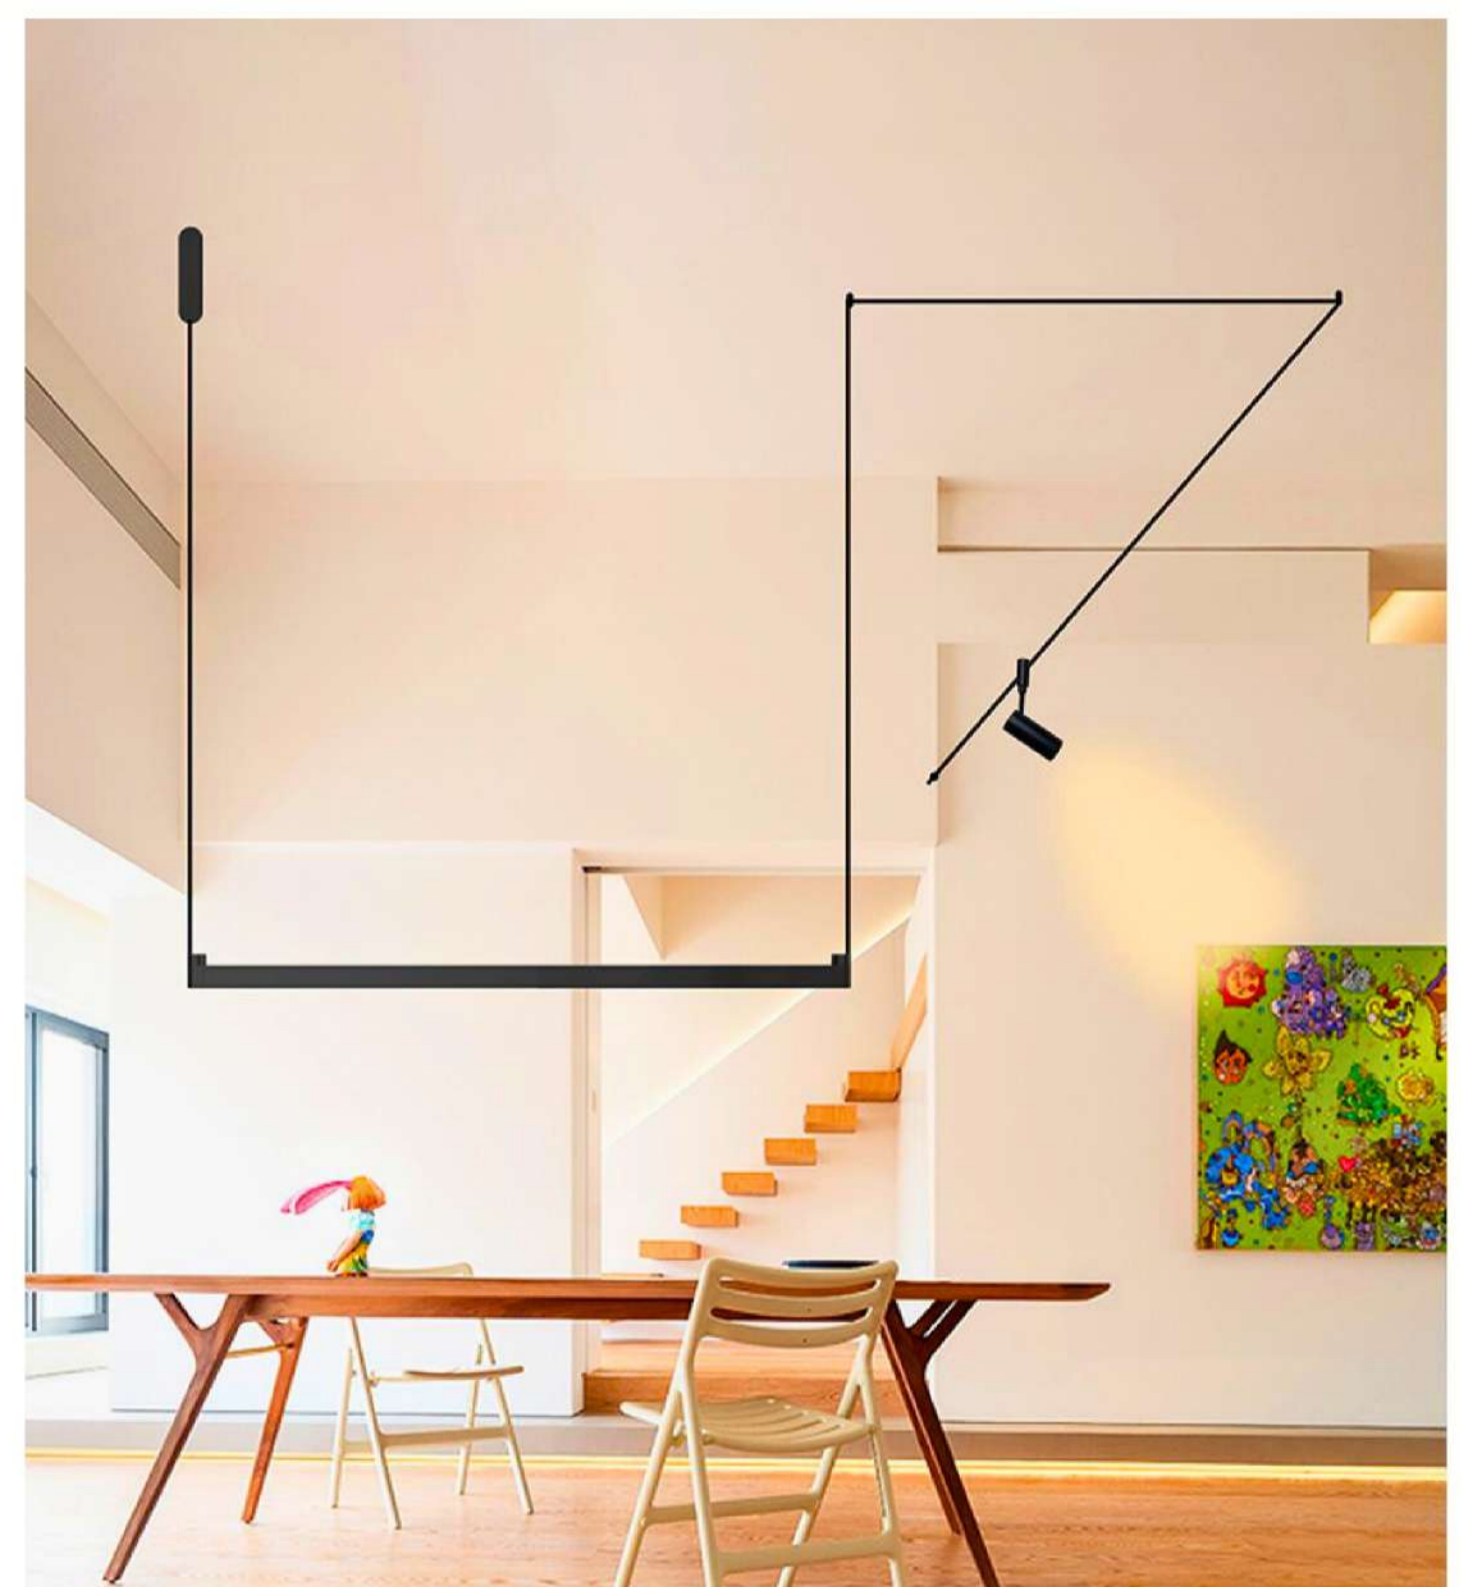

*Combine different
luminaires for
customized design*

*Use colored cables
for extra
vibe*

Unleash your imagination!
